

U.S. Voter Registration Web-Based Count and Order System

Media One

Fresh Data. Direct from the Source.

Pull & Order Voter Data from your Computer

Introducing the Media One Web-Based Count & Order System for the Nationwide U.S. Voter File

- Pull and order postal, email and phone data 24/7 from your own computer
- NCOA and Email updates every month
- Phones updated daily
- No 3rd Party needed for data hygiene, appends, merge/purges, or data overlays

Save Time and Money

Unlike most other online data services, you will never have to question whether the data is up-to-date. And, you'll never have to wait—or, spend additional funds—for your data hygiene or append to be done by a 3rd Party.

Right on the system you can do your own demographic & targeting attribute overlays, appends, merge/purges & suppressions. You can keep this consistent or change it for various campaigns.

Convenient 24/7 Access Anytime, Anywhere

Once approved and registered, you can pull data anytime, anywhere right from your computer—because successful Political Marketing requires you to be ready to move when the situation demands action!

Just a click of your mouse lets you set criteria and search the most accurate and up-to-date Voter data available to Political Candidates, PACs and Special Interest Groups engaged in an election or political venture.

159 Million Postal Records

23 Million Email Addresses

Landline and cellphone data available
